K. P. PUTTANNA CHETTY, Esq.,

Honorary President, Municipal Council,

Bangalore City.

To

The Secretary to the Government of

His Highness the Maharaja of Mysore,

General & Revenue Departments, Bangalore.

SIR,

B

With reference to your official memorandum No. 4099/Ml.33-15-39 dated the 4th December 1915, forwarding for disposal a petition from B. Sankarappa and other residents of Hale Kasai Road, Bangalore City, complaining that several shops for the manufacture and sale of explosives have been permitted in their quarters of the town so as to endanger the safety of residents of the locality and praying that the said shops may be ordered to be removed to a less objectionable neighbourhood, I have the honor to state that the danger complained of by the petitioners really exists and requires early redress. The fireworks in various stages of manufacture are stored in small shops and are a menace to the safety of the whole neighbourhood. It is providential that no serious conflagrations have occurred, but the danger is ever present.

2. With a view to the City Municipality having some control in the granting of licenses for the manufacture and sale of — fire works, this item of trade was included in the

Draft

Submitted to the Honorary President:--

Encl to Hl 222-15-1

Government in their order No.9376 Ml. 69-13-109 dated 25th May 1915 directed the deletion of "Fire Works" from the draft Bye laws to regulate Dangerous and Offensive Trades, submitted by the City Municipal Council for sanction. The manufacture and sale of "Fire Works" are controlled by the Mysore Explosives regulation of 1888 and the rules framed thereunder.

(2) According to this regulation, "Fire works" fall into the 7th class of explosives and have 2 main divisions viz "Fire work compositions" and "Manufactured Fire works." Each process of manufacturing, possessing or selling "Fire works" should be licensed by the District Magistrate. (Rule 9)

(3) The explosive shall be manufactured in a tent or any lightly constructed one storeyed building exclusively appropriated for the purpose and separated from any dwelling house, highway, street, public thoroughfare or other public or frequented place or any place where explosive is stored by the distance

(a) In the case of "Fire work Compositions" of 100 yards

(b) In the case of "Manufactured fire works" of 50 yards and made and closed so as to prevent unauthorised persons from having access thereto and to secure it from danger from without (condition 4 of the license form under Rule 9).

(4) The explosives shall be kept in a substantially constructed unflammable building or fire proof safe approved by the Licensing Officer and separated from any dwelling house, highway, street, public thoroughfare or other public or frequented place or any place where explosive is stored by the distance,

(a) in the case of "Manufactured Fire works" of 50 yards

(b) in the case of "Fire work compositions" of 100 yards and made and closed so as to prevent unauthorised persons from having access thereto and to secure it from danger from without.

Provided that 50 lbs or less of Fire works/ Compositions and 100 lbs of manufactured Fire works may be kept in a dwelling house or other building not satisfying the above conditions in a secure receptacle exclusively appropriated to keeping explosive (condition 2 of the Licese form under Rule 9).

(5) It will thus be seen that more latitude is shown in the case of "Manufactured Fire works" than for "Fire work compositions" and in the case of buildings where explosives of these 2 Divisions are merely stored than for places where they are actually prepared.

(6) The undersigned is not aware to what extent public convenience demands the existence of large stores of Manufactured Fire works in the most crowded part of the city; but there cannot be any doubt that the Manufacture and storage of highly explosive "compositions" in such locality should strongly be condemned. During the last 15 years, 2 explosions involving loss of life and damage to property have been reported and~~as~~ it is perhaps through extraordinary good fortune that worse fate has not befallen the residents in the neighbourhood. The ghastly catastrophe that might result from the Fire spreading on the clothes stores in Avenue Road can easily be conceived without putting undue strain on the imagination.

(7) The undersigned therefore believes that the petitioners have just cause to be anxious about their life and property in this vicinity and that the Municipality should adopt measures to secure redress.

(8) It seems to be absolutely necessary that Manufacturing Fire works and storing Fire works/ Compositions should be prohibited by a strict adherence to the terms of the Mysore Explosives Regulation by the District Magistrate. With regard to storage or exposure for sale of "Manufactured Fire works" Government may be moved to permit the Municipality inserting that item in the Bye laws regulating

regulating Dangerous Trades.

FROM

DR. W. F. SMEETH, M.A., D.SC., A.R.S.M., &c.,
Director, Department of Mines and Geology,
Mysore State.

To

D.M.Narasinga Rao, Esquire, B.A., B.L.,

Secretary to the Government of His Highness the
 Maharaja of Mysore, General Department.

SIR,

In reply to your letter No. G.14503/Geol. 61-15-2, dated 19th April 1916, regarding the manufacture and storage of ~~explosives~~ fireworks in certain localities in Bangalore City, I have the honour to enclose herewith a Note on the Subject by the Inspector of Explosives from which it will be seen that, in the locality referred to there are five licenses for the possession and sale of manufactured fireworks but no license for the manufacture of fireworks or firework composition. The licenses are granted by the District Magistrate in accordance with the provisions of the Explosives Rules and so long as the conditions of the licenses are observed there would appear to be no reason for cancelling them or refusing to grant them. It is presumed that the conditions have been drawn up with due regard to safety based on experience. I do not think that the opinion of the President, Municipal council, should override the Statutory Rules, but, if the storage of explosives in any particular instance was considered undesirable, the President might address the District Magistrate on the subject, who, as the licensing officer, could refuse a license if satisfied as

to

16

to the soundness of any objection.

2. The enclosures to your letter under reply are returned herewith.

I have the honour to be,

Sir,

Your most obedient servant,

Director,

Department of Mines and Geology.

jun

Office Note.

File No.

of

Letter No.G.14503/Geol.61-15-2, dated 19th April 1916, from the Secretary to Government General Department.

The residents of Hale Kasai Road, Bangalore City, the Health Officer, the City Municipal Council and the Honorary President, are all of opinion that manufacturing of "Explosive Composition" and its storage and that of manufactured fireworks in crowded localities like the Old Kasai Road is unsafe and objectionable. The point has not been lost sight of in the Mysore Explosives Rules which are framed on the lines of the British India Rules which in turn are extracted from the Rules in force in England; provision to prevent all indiscriminate and unlicensed dealing has fully been made.

2. There are current in the locality complained of 5 premises licensed merely for the possession and sale of prepared fireworks within the quantities limited by the District Magistrate consistent with the conditions of the situation of the premises; For manufacturing the fireworks however the District Magistrate has assigned places in Doddabail Khana, ^{Kumbhar} ~~Kumbhar~~ Gunte, Siddapur and Gurappanapalya.

3. The petitioners request that dealing in explosive articles in Old Kasai Road should be entirely put a stop to; the Health Officer suggests that manufacturing of fireworks and storing firework composition should be prohibited by a strict adherence to the Explosives Rules by the District Magistrate and that the item of exposure for

File No.

of

sale of manufactured fireworks may be inserted in the Bye-Laws regulating Dangerous Trades; the Municipal Council is of opinion that the Police should be instructed to seek the opinion of the Council before disposing of applications for manufacturing or storing firework composition in the City and the Honorary President proposes that the Police Department should secure the opinion of the President in the first instance prior to the disposal of applications by ^{them} ~~Rule 9 of the Mysore~~ ^{Rule 9 of the Mysore} Explosives Rules vests the authority to grant licenses within 200 lbs. in the District Magistrate and he can exercise his full discretion in regard to the selection of places for manufacture, storage and sale in strict adherence to the prescribed conditions. Besides, he has full power to limit the quantities of storage in accordance with the circumstances and surroundings. It is not understood what the Police have to do in the disposal of applications, but all Police Officers of and above the rank of Inspectors are empowered to occasionally inspect the sale and other premises according to Rule 43 and bring to light any miscarriage of the rules or conditions of the license.

4. The manufacture of Explosives is governed by conditions laid down on Explosive License Form A. Condition 4 fixes the distances by which the places of manufacture of Explosives should be removed from dwellings, highways, street, public thoroughfare or other public or frequented place in order to prevent danger to person or property

File No.

of

and conditions 7 to 11 prescribe the manner of storage of explosives consistent with safety. If these conditions above referred to are strictly adhered to there is no reason to apprehend any danger to person or property under ordinary circumstances and the complaint of the petitioners should be regarded as only imaginary.

✓ 5. Rule 5. Sec.2 (a) authorizes the possession of fireworks not exceeding 50 lbs. within Municipal areas and not exceeding 200 lbs. outside, if intended for use and not for sale and if not kept for more than 14 days.

✓ 6. Rule 5 Sec.2(b) authorizes the possession of fireworks within Municipal areas exceeding 50 lbs. and not exceeding 200 lbs. if not kept for more than 15 days and if obtained for use and not for sale with the sanction of the Magistrate of the First Class or Police Officer not below the rank of an Assistant Superintendent of Police.

7. Further, it has been proposed to introduce a clause in the Explosives Rules now under revision before Government in accordance with Government of India Rules that a permit may be granted by the District Magistrate to holders of licenses in Forms A, B, C & D to possess for a period of 14 days subject to the conditions in the license (except in this respect) any quantity of manufactured fireworks not exceeding two thousand pounds.

8. Neither the Municipal Council nor the Health Officer nor the Police is competent to decide whether the manufacture or possession of explosives may or may not be

File No.

of

permitted in any particular area. The matter is clearly one to be regulated in accordance with the Explosives Regulation and Rules which have been framed with the special object of regulating the manufacture, possession, sale etc. of Explosives and with due regard to the safety of persons and property. The rules apply generally to the State as a whole and an invidious exception cannot be made in the case of the Bangalore City or the Bangalore Municipality.

9. As full provision already exists in the rules in force in Mysore no further additions to or amendments of the Rules on the subject is deemed necessary.
